FOR IMMEDIATE RELEASE  
October 17, 2016

## AED, Inc., an engineering and design firm, announces its place in the Prince George's Country (MD) Clean Water Partnership

Hyattsville, MD, October 17, 2016— AED, Inc., an engineering and design firm based in Prince George's County, Maryland, has been selected to be part of the design team for the nation's first public-private partnership to alleviate storm water pollution. AED, Inc. has been chosen to design the outfall portion of the project, the discharge system for the treated stormwater. AED's portion of this project is part of a much larger whole that will use the skills and resources of many different firms. More information is available about AED, Inc. and their project portfolio at <http://www.aedworld.com/aed-joins-corvias-clean-water-partnership>.

*"The Clean Water Partnership is a very significant project in Prince George's County. AED is pleased to be working on the project as a county-based business; we are very excited to be supporting this project on the design side." – Reginald Waters, Founder and Chairman, AED, Inc.*

The Clean Water Partnership is a project led by Prince George's County and Corvias. It is the first project of its kind in the US to bring together public and private entities to solve storm water pollution concerns. More information on the Clean Water Partnership is available at <http://thecleanwaterpartnership.com/>. In response to regulatory pressures and a need to preserve the beauty and cleanliness of the county, officials created this Community Based Public Private Partnership or CBP3. The project will span the entire county and several decades.

*"In the United States, there has not been a public/private partnership to design, build, and operate storm water infrastructure. So, Prince George's County is the first and it is getting visibility throughout the world. The county has already had visitors come from as far away as Korea to look at the project and the impact it will have on stormwater infrastructure." - Reginald Waters, Founder and Chairman, AED, Inc.*

*“We continue to position AED as a leading engineering and technical services firm focused on key customers and communities, to bring not only our capability and expertise to project stakeholders, but also to develop solutions to recurring engineering and environmental problems across the globe.” - Greg Moore President and CEO, AED, Inc.*

AED Inc. (AED) is a solutions-driven, multi-discipline engineering, construction management, professional services and information technology firm that delivers high-quality cost-effective services to public and private clients. Headquartered in Hyattsville, Maryland, AED currently employs 60+ staff across 12 states. They have branch offices in Greenville, SC, Atlanta, GA, Orlando, FL and Jersey City, NJ.
